Art Unit: 1621

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 24, drawn to guanidine compounds and compositions, classified in class 564, subclass 230+.
 - II. Claims 17, 18 and 20, drawn to methods for treating nerve cell death and conditions associated with trauma, hypoxia or decreased oxygen or blood flow to the brain, classified in class 514, subclass 533.
 - III. Claims 16, 19 and 21-23, drawn to methods for treating disorders of the nervous system involving excessive neurotransmitter release, classified in class 514, subclass 633.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and both II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed could be used as a fungicide.
3. Inventions II and III are held to be distinct inasmuch as methods for treating nerve cell death would not necessarily suggest methods for treating neurodegenerative diseases such as Alzheimer's disease to one skilled in the art.

Art Unit: 1621

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicants are further required to elect a single disclosed species, i.e. a single compound, for examination purposes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter O'Sullivan whose telephone number is (703) 308-4526.
